

MindStream Analytics Delivers Six presentations at Kscope12

How VISA Pushes Training to Effectively Handle Change Management

Seth Landau, MindStream Analytics

When: Monday June 25, Session 2, 10:00 am - 11:00 am

Objectives of this session include: Share best practice process for training end users in a global Hyperion Planning deployment; Explore the role that Oracle User Productivity Kit (UPK) has on training strategy; and Lessons learned from the Global training implementation.

Financial Data Quality On-demand - Seamlessly Integrate Hyperion FDM and Oracle Data Integrator

Matthias Heilos, MindStream Analytics

When: Tuesday June 26, Session 10, 3:45 pm - 4:45 pm

Two key parts to the solid foundation of an agile EPM system are data integration and data quality. Based on the nature of those two, IT and business always have to work things out together. Oracle presents two solutions: Financial Data Quality Management (FDM) is branded for Business and Oracle Data Integrator (ODI) is in the IT domain. Both are great tools. Learn when to use which one, or when to use both and how to integrate them seamlessly to create an on-demand process endorsed by IT and driven by the business

How to Leverage the New Smart View for Essbase

Alexander Ladd, MindStream Analytics

When: Tuesday June 26, Session 11, 5:00 pm - 6:00 pm

The objectives of this session include: Essbase add-in users will learn about the expanded functionality of Smart View; Details on the top ten new features of SmartView 11.1.2.102; and Learn how to easily migrate to the new SmartView add-in.

OBIEE vs Financial Reports: Oracle's Future in EPM Reporting

Alexander Ladd, MindStream Analytics

When: Wednesday June 27, Session 12, 8:30 am - 9:30 am

The objectives of this session include: what is Oracle's BI Foundation Suite; features and functions for reporting, ad-hoc analysis, and dashboards; and making sense of the alphabet soup of Oracle's reporting tools.

Oracle Data Integrator - Best Practices That You Should Be Aware Of

Matthias Heilos, MindStream Analytics

When: Wednesday June 27, Session 14, 11:15 am - 12:15 pm

Oracle Data Integrator (ODI) is a powerful data integration suite which allows you to build integration processes with enormous productivity gains over conventional tools of the same breed. In this session, you will gain insights in how ODI works and what you should consider to build master-class integrations. Learn about tricks and tips on architecture, Knowledge Module optimization, migration, flexible load processes, and many other areas that your organization should be aware of when working with ODI.

How Atco Energy Optimized Their HFM Environment

Seth Landau, MindStream Analytics

When: Wednesday June 27, Session 16, 3:00 pm - 4:00 pm

The purpose of this presentation is to detail a client case study on the use of Accelatis to: Review Performance degradation of the client's HFM applications; track user activity to isolate process bottlenecks; review server and infrastructure activity; facilitate the application review; and assist functional and infrastructure consultants to make technical, functional, and process recommendations
