# Audience Participation

- How many of you are Essbase Users?
  - What type of Essbase Users? (Add-in, Smart View, Reports)
- How many using OBIEE?
  - Are you here because you might start using Essbase?
- How many have both currently?
- How many of you are ex-Pinnacle?

# OBIEE Querying Essbase

- OBIEE as Reporting Tool – Essbase as Data Source
  - Basics
    - Can OBIEE Pull Data from Essbase and read the dimension structures? - **YES**
    - Can the Data from Essbase be represented in OBIEE graphs and Dashboards nicely? - **YES**
  - More Advanced
    - Can Answers Provide Web Enabled Ad Hoc Analysis with Essbase as the Data Source? – **Kind Of?**
      - Drill Down but not up
    - Can OBIEE provide good financial Reporting from Essbase? - **NO**
      - OBIEE is a relational Query tool so it makes Essbase behave that way too
        - » This means that Ragged Hierarchies aren't presented optimally
      - Asynchronous Rows is not supported

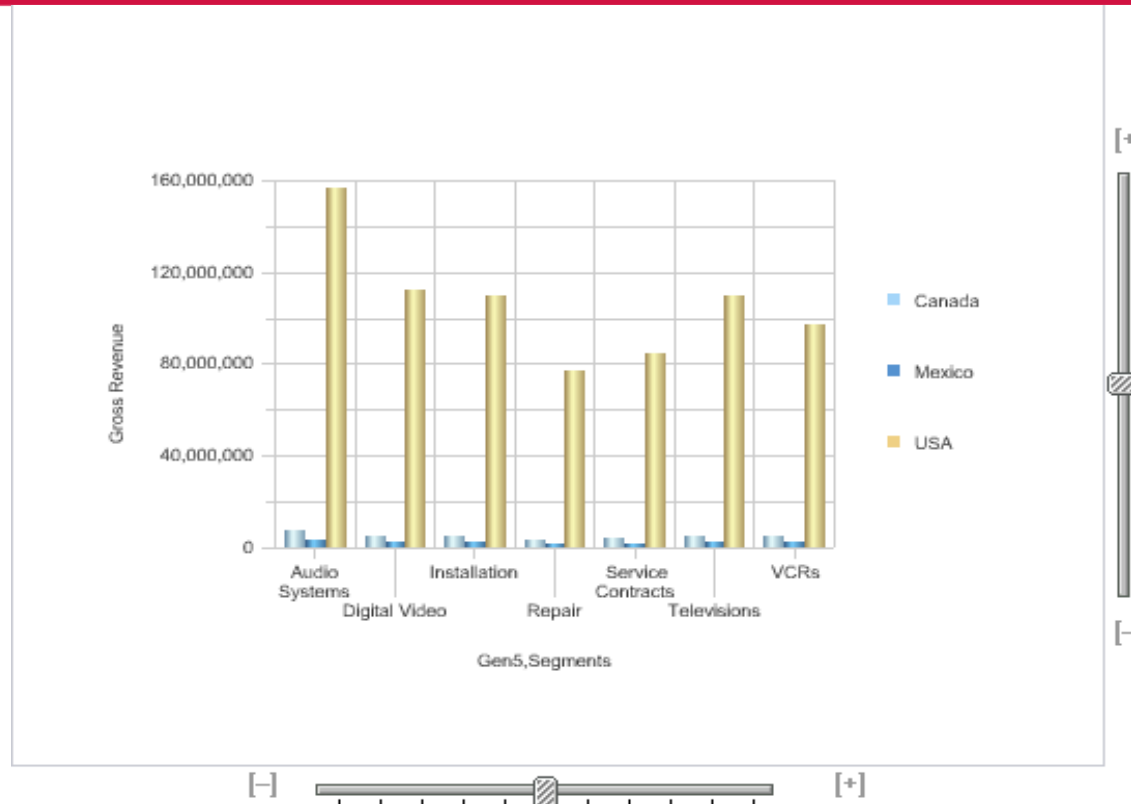

# Essbase in the RPD file

The screenshot displays the Oracle BI Administration Tool interface with three panes:

- Presentation:** A tree view showing a hierarchy of objects. A red circle highlights 'Plan1' under the 'demo' folder. An arrow points from a 'Measures' label to this circle.
- Business Model and Mapping:** A tree view showing a hierarchy of objects. A red circle highlights 'Attribute Calculations' under the 'demo' folder. An arrow points from a 'Dimensions' label to this circle.
- Physical:** A tree view showing a hierarchy of objects. A red circle highlights 'Attribute Calculations' under the 'demo' folder. An arrow points from a 'Dimensions' label to this circle. Another red circle highlights a list of financial measures (e.g., Accounting Firm Fees, Accounts Payable, etc.) under the 'demo' folder. An arrow points from a 'Measures' label to this circle.

The RPD showing the Essbase Data Source, the Essbase as Business Model and Essbase in the Presentation Layer.

# OBIEE Charts

## OBIEE Charts with Essbase Data

Here is multi-bar chart created in OBIEE Answers for use in a Dashboard. The OBIEE charts are very sharp and offer a rich User Interface experience. The Essbase data flows in well.

# Drilling Down on Columns

Gen5,Segments	Gross Revenue		
	Total Geography		
	North America		
	Canada	Mexico	USA
Audio Systems	7,529,463	3,764,732	156,236,358
Digital Video	5,399,344	2,699,672	112,036,397
Installation	5,281,344	2,640,672	109,587,888
Repair	3,718,391	1,859,195	77,156,604
Service Contracts	4,079,374	2,039,687	84,647,009
Televisions	5,290,985	2,645,493	109,787,943
VCRs	4,672,533	2,336,266	96,955,055

Gen5,Segments	Gross Revenue
	Total Geography
	North America
	USA
	USA Sales
Audio Systems	156,236,358
Digital Video	112,036,397
Installation	109,587,888
Repair	77,156,604
Service Contracts	84,647,009
Televisions	109,787,943
VCRs	96,955,055

## Drilling Down on “USA”

By drilling down on the “USA” member the whole flavor of the report changes. Canada and Mexico are removed and the USA child appears. This is the way a relational tool works, think of adding parameter to the WHERE section of a SQL Statement.

# Drilling Down on Rows

	Gross Revenue		
	Total Geography		
	North America		
Gen5,Segments	Canada	Mexico	USA
Audio Systems	7,529,463	3,764,732	156,236,358
Digital Video	5,399,344	2,699,672	112,036,397
Installation	5,281,344	2,640,672	109,587,888
Repair	3,718,391	1,859,195	77,156,604
Service Contracts	4,079,374	2,039,687	84,647,009
Televisions	5,290,985	2,645,493	109,787,943
VCRs	4,672,533	2,336,266	96,955,055

					Gross Revenue		
					Total Geography		
					North America		
Gen5,Segments	Gen2,Segments	Gen3,Segments	Gen4,Segments	Gen6,Segments	Canada	Mexico	USA
				DVD Player	2,084,062	1,042,031	43,244,292
				DVD Recorder	709,580	354,790	14,723,782
Digital Video	Total	All Segments	Electronics	DVD/VCR Combo	1,114,303	557,152	23,121,790
				Portable DVD	1,491,399	745,700	30,946,534

## Drilling down on “Digital Video”

Drilling down of the “Digital Video” member doesn’t result in the same thing that most Essbase Users would expect. Instead we see only the children of “Digital Video” and the rest of the products no longer appear.

# Undoing Drill Downs - 1

Criteria Results Prompts Advanced Dashboards - Answers - More Products - Settings - Log Out

OAUG ConnectionPoint Fin Analysis

## Columns

Click on column names in the selection pane to add them to the request. Once added, drag-and-drop columns to reorder them. Edit a column's format, formula and filters by clicking the buttons below its name.

Time Periods	Segments	Entities			Plan1
Year	Gen5,Segments	Gen2,Entities	Gen3,Entities	Gen4,Entities	Gross Revenue

Display Results Remove All

## Filters

Add filters to the request criteria by holding down the CTRL key and clicking on column names in the selection pane, or by clicking on the filter button below included columns. Add a saved filter by clicking on its name in the selection pane.

Gen2,Scenarios is equal to / is in Actual		
AND Year is equal to / is in Year Total		
AND Gen2,Versions is equal to / is in Working		
AND Gen2,Years is equal to / is in Prior Year		
AND Gen2,Entities is equal to / is in Total Geography		
AND Gen3,Entities is equal to / is in North America		

Save Filter... Remove Filters

Combine with Similar Request

## Prior to Drill Down

Notice Gen5,Segments only. The filters are only Scenario, Version, Periods, Year and Entities.

# Undoing Drill Downs -2

The screenshot shows the OAUG ConnectionPoint Fin Analysis interface. At the top, there are tabs for 'Criteria', 'Results', 'Prompts', and 'Advanced'. The 'Criteria' tab is active. Below the tabs, there are navigation icons and the text 'OAUG ConnectionPoint Fin Analysis'. The main content area is divided into two sections: 'Columns' and 'Filters'.

**Columns**

Click on column names in the selection pane to add them to the request. Once added, drag-and-drop columns to reorder them. Edit a column's format, formula and filters by clicking the buttons below its name. (?)

Time Periods	Segments					Entities		
Year ↓↑	Gen5,Segments ↓↑	Gen6,Segments ↓↑	Gen4,Segments ↓↑	Gen3,Segments ↓↑	Gen2,Segments ↓↑	Gen2,Entities ↓↑	Gen3,Entities ↓↑	Gen4,Entities ↓↑

Buttons: Display Results, Remove All

**Filters**

Add filters to the request criteria by holding down the CTRL key and clicking on column names in the selection pane, or by clicking on the filter button below included columns. Add a saved filter by clicking on its name in the selection pane. (?)

- Gen2,Scenarios is equal to / is in **Actual**
- AND Year is equal to / is in **YearTotal**
- AND Gen2,Versions is equal to / is in **Working**
- AND Gen2,Years is equal to / is in **Prior Year**
- AND Gen2,Entities is equal to / is in **Total Geography**
- AND Gen3,Entities is equal to / is in **North America**
- AND Gen5,Segments is equal to / is in **Digital Video**

Buttons: Save Filter..., Remove Filters

Combine with Similar Request

## Post Drill Down

Notice all the new segment columns. The filters now have a Segments limitation. In order to drill back up we need to re-launch the original saved version or delete all of the "Criteria" additions the Drill Down added.

# Asynchronous Rows

Gen1,Entities Entities ▾

Gen5,Segments		Q1	Q2	Q3	Q4
Installation	Headcount	310	311	311	311
	Gross Revenue	75,721,270	26,406,720	52,813,440	110,908,224
	Operating Expenses				
	\$\$ per Head	244,262	84,909	169,818	356,618
Repair	Headcount	210	211	211	211
	Gross Revenue	8,660,005	59,400,951	35,880,354	82,463,779
	Operating Expenses				
	\$\$ per Head	41,173	281,521	170,049	390,824
Service Contracts	Headcount	289	289	289	290
	Gross Revenue	31,146,020	32,634,991	42,833,426	97,904,974
	Operating Expenses				
	\$\$ per Head	107,772	112,924	148,213	337,992

Could use a CASE for  
Gross Rev or OpEx

\$\$ per Head uses a  
CASE Statement

## OBIEE Can't Handle Asynchronous Rows Well

You can make Asynchronous Rows in OBIEE but you need to use a CASE statement and that is much more time consuming than what you can achieve in Hyperion Reports.

# Financial Reporting

## Not as flexible as Hyperion Reports

OBIEE is a SQL query tool and it is designed to bring back SQL grids. The grid above is nice and informative, but it's not ready to present to senior management and even putting it in BI Publisher wont get it completely ready.

# Essbase Querying OBIEE

- Essbase on top of OBIEE (rpd as data source)
  - Works Like EIS
  - Essbase Schema becomes somewhat inflexible
    - Certain Changes can be problematic
  - All in all it works pretty well

# Some Issues

- Lack of ability to do Asynchronous Rows
  - If you are an organization that needs Cost Center or Cost Type and Accounts in the Rows to create a Financial Statement this can be an issue
- When using RPD as a data source for Essbase Studio you can't add a new member without rebuilding the entire schema
- When using Essbase Studio your model should be mature
  - Adding levels to a dimension entails full rework

# Customer Stories

- Investment Bank
- Wanted Financial Dashboard
- Project Successful Overall
- End Result was a set of Dashboards that were highly scripted and static and launched users into Financial Reports for any type of ad hoc analysis on the web
- Lots of Scripting in OBIEE
- BI Publisher was determined not to be capable of handling needed reporting due to asynchronous row limitation
- Mutual Fund
- Wanted OBIEE and BI Publisher
- Lots of problems with BI Publisher handling the relational data
- Changed course and decided to use OBIEE rpd as source for Essbase models
- Essbase Cubes built using Essbase Studio
- Essbase Cubes feed Financial Reports to deliver information

# What's coming

- OBIEE interface is getting major overhaul
  - Asynchronous row issue will be resolved by what Oracle is calling “Dimensional Columns”
  - OBIEE will handle Essbase more like Financial Reports does today
- “Custom Group – Results”
- Grid Navigation in what Answers calls a Pivot Table will be much like the Excel Add-in

## Dimensional Columns

- New column type with unique capabilities
- Achieved by dragging and dropping hierarchy from Subject Area tree on to workspace
- Single column with expansion capabilities
- Asymmetrical Drilling
- "Drill Up"

The screenshot shows a Pivot Table window titled "Pivot Table" with a dropdown menu set to "2001". The table is structured with a hierarchy of divisions and countries. A red circle highlights the "Americas" section, which includes Argentina, Brazil, Canada, Colombia, Mexico, and USA. The table data is as follows:

	All Products		Accessory Division		Audio Division		Video Division	
	Costs	Sales	Costs	Sales	Costs	Sales	Costs	Sales
World	1,200	2,460	400	820	400	820	400	820
Americas	300	660	100	155	100	285	100	220

Australia	300	600	100	200	100	200	100	200

# Maps!!!!

The screenshot displays a BI tool interface titled "Regional Profit and Sales". The main window shows a map of the United States and Mexico. The map is overlaid with pie charts representing quarterly sales data (Q1, Q2, Q3, Q4) and red shaded areas representing costs. The interface includes a left-hand navigation pane with a tree view of data sources, a top toolbar with various map controls, and a right-hand panel for configuring data layers and map features. The "Map" button in the top-left corner is circled in red.
