## **MindStream Analytics Partners with Talvis LLC to Offer Mobile Business Intelligence Reporting Application Savant**

**Boston, MA** – MindStream Analytics, a leading consulting and managed services provider, announced their strategic partnership with Talvis LLC and their flagship software, Savant Mobile. Savant is a powerful business analytics tool that allows users to query their Oracle Hyperion Essbase systems by simply speaking to their iPhone/iPad. As part of the technology partnership, MindStream will provide consulting and implementation services for Talvis's patented voice-recognition business intelligence (BI) software.

Savant users can make report requests directly to their smart phones. Results are formatted into an interactive pivot table or graph, and can be modified by adding, changing or deleting information as needed, all through the power of voice.

“Talvis LLC has developed an amazing business intelligence tool that is radically different than anything else in the market. Our clients are very interested in its capabilities and ease of use. Savant is like a Siri for Essbase; users ask their smart phone a question and Savant provides the answer,” says Lisa Spencer, EVP of Sales and Marketing for MindStream Analytics. “Their voice-recognition technology is really a game-changer in the mobile BI space.”

MindStream's business intelligence and technology consultants are well-equipped to manage Savant integrations due to their particular depth of experience in Oracle Hyperion and in enterprise performance management (EPM). With this strategic partnership, EPM customers will be able to quickly integrate a mobile voice-recognition tool with their financial application. Once integrated, customers will have access to their data anywhere, at any time, enabling improved time from analysis to decisions.

“We are very pleased to be partnering with MindStream Analytics who have demonstrated expertise of services across Oracle Essbase and EPM products and are an Oracle partner,” said Kevin Bermingham, Managing Partner at Talvis LLC. “Their network and industry reputation will expand our distribution and marketing channels.”

### **About MindStream Analytics**

MindStream Analytics, headquartered in Boston, MA, is a leading consulting and managed services provider. Our team is made up of business and technical experts that believe in the **power of data**.

We know that, to not only survive but, to excel in today's environment, organizations *must* have insight across the organization to enable actionable financial decisions that achieve positive business results; those that accomplish this ***win with data***.

We love challenging work—the messier the data, the better. We're the partner to turn unruly, chaotic data into meaningful information for better, faster, and more accurate decision-making. *We know finance; we get it.*

MindStream has been recognized by *CIO Review*, ProformaTech, and others for our innovative thinking and business analytic applications expertise. In 2015, MindStream was named by MSPmentor as one of the “Top 501 Managed Services Providers.”

#### **About Talvis LLC**

Talvis LLC creates business intelligence solutions that provide information at the speed of thought. The software integrates leading voice-recognition technology from Nuance Corporation with Oracle's market leading OLAP software, Hyperion Essbase. The simple and intuitive software lets any user query, chart, and collaborate on their company's financial and metric data. For more information, visit [www.talvisllc.com](http://www.talvisllc.com).
